Help Us Understand the Outcomes that People Hope to Achieve Through the EHCNA Process

A short survey for schools and settings across Cambridgeshire

Cambridgeshire Educational Psychology Service

There are many assumptions about why Education, Health and Care Needs Assessments (EHCNAs) are requested.
We would like to better understand the outcomes schools and settings hope the EHCNA process will make possible for children and young people.

Through this survey, we will explore:

- What schools and settings hope the EHCNA process will make possible for children and young people
- How schools and settings understand parent/carer aspirations for the EHCNA process

Why are we asking?

The findings will help us better understand the factors driving requests for EHCNAs and may inform future service development. They may also contribute to published research that can be used to support better understanding of the needs of schools, settings, families and young people in the context of national changes in the SEND System.

Although understanding parent/carer perspectives is important, we are not collecting parent/carer responses through this survey. We are exploring alternative approaches that will allow parent/carers' views to be gathered in an appropriate and meaningful way.

Who Can Take Part?

School and Setting Staff

We would particularly welcome responses from colleagues involved in decisions about Education, Health and Care Needs Assessments, including:

- SENCOS
- Headteachers
- Senior Leaders
- Inclusion Leads
- Teachers
- Early Years Setting Leaders

Survey Length

Approximately 5 minutes

Interested in Further Discussion?

At the end of the survey, you can choose to leave your contact details if you would like to hear about optional follow-up focus groups.

Thank You

Your experiences and perspectives will help us better understand what schools and settings are hoping to achieve through the EHCNA process and how education services can respond most effectively.
