

# Blowing Up Balloons

Inspired by:

This week, the children have been exploring Science, Technology, Engineering and Maths (STEM) through an activity inspired by a local business as part of the Cambridgeshire STEM in the Early Years.

The children were challenged to help blow up a balloon using chemical energy, mixing vinegar and bicarbonate of soda to produce gas. This has been inspired by activities planned for students for Cambridge LaunchPad by SLB, an energy company committed to helping achieve net zero, located on Madingley Road, Cambridge.
