

Pipe Planes

Inspired by:

 MARSHALL

This week, the children have been exploring Science, Technology, Engineering and Maths (STEM) through an activity inspired by a local business as part of the Cambridgeshire STEM in the Early Years.

The children were challenged to build straw paper aero planes, and then test to see which design flew the furthest.

This has been inspired by Marshall Aerospace, a company headquartered in Cambridge. They are a founder of Cambridge LaunchPad and have a strong track record of supporting their local community.
