

Potato Safety Helmets

Inspired by:

**Huxley
Bertram**

This week, the children have been exploring Science, Technology, Engineering and Maths (STEM) through an activity inspired by a local business as part of the Cambridgeshire STEM in the Early Years.

The children were challenged to design a safety helmet for a potato that they could test by dropping a small object onto it. This has been inspired by a device designed by Huxley Bertram, an engineering firm located near Highfields Waterbeach, Cambridge. Huxley Bertram is a leading bespoke automation and special purpose machine provider for major companies.
