

Programme Grids

Inspired by:

NINJA THEORY

This week, the children have been exploring Science, Technology, Engineering and Maths (STEM) through an activity inspired by a local business as part of the Cambridgeshire STEM in Early Years.

The children were challenged to give instructions to an adult and their friends to move around a grid, receiving a playful reward if they were successful! This was inspired by Ninja Theory, a BAFTA Award-winning game design studio based in the heart of Cambridge, who have a passion for helping young people develop their STEM skills.
