

This Little Bee

©The3Engineers Ltd 2022

This little bee flaps their wings for hours – buzz, buzz, buzz,

This little bee smells out all the flowers.

This little bee is a pollen collector,

This little bee loves drinking nectar.

This little bee returns to the hive that it calls home,

And this little bee waggles dances on the comb.

This little bee looks after their queen,

This little bee keeps their home clean.

This little bee helps dry all the honey below,

This little bee spreads the pollen to help seeds grow.

This little bee puts their head down for a rest,

And this little bee listens to stories about how they're the best.
