Version 6.1 September 2023

Cambridgeshire's SEND (Special Educational Needs and Disabilities) Specialist Services 0-25 years provide a range of professional services for children, young people and families in a wide range of educational and community settings. We use the expertise of an incorporated multi-professional service (consisting of psychologists and educational professionals) to offer schools and settings a bespoke approach to removing barriers to learning (including academic, social and emotional barriers).

Additionally, we offer a range of packages that schools and settings can commission from our teams. We work collaboratively with schools to support a range of needs and priorities, drawing upon theory and research of 'what works' to develop an understanding of complex situations.

We take a positive, solution-focused approach to our work, which means we are interested in moving forward and enabling schools and all pupils to achieve their potential.

The following information gives details of the enhanced support that schools and settings are able to purchase from SEND Specialist Services, subject to capacity within the teams. This information will be updated at the end of the academic year 2024.

### **SEND Training and Development programme 23-24**

In addition to the traded offer, ALL primary and secondary schools will have access to a rolling programme of core training offered throughout the year. This will consist of a combination of virtual and face to face open courses bookable via booking bug. Time allocation hours will be redistributed to ensure that all schools have access to training. Training will be free (or, where licencing fees or venue hire applies at a very minimal cost). Each course will run 2 – 4 times per term. Please see booking bug for details of the open training that is available. [SEND Online calendar booking \(bookingbug.com\)](https://www.bookingbug.com)
